MASTER OF SCIENCE IN BIOSCIENCE & HEALTH POLICY

PREPARE YOURSELF FOR MEDICAL SCHOOL, PHARMACY SCHOOL, VETERINARY SCHOOL, PA PROGRAMS & MORE

The M.S. in Bioscience and Health Policy trains you in science policy by deepening your scientific background and broadening your expertise in business, management, sociology, economics, and policy studies. It emphasizes communication, professional development, policy writing, and study skills to craft specific policy recommendations. With direct access to Rice University's Baker Institute for Public Policy, you'll collaborate closely with policy scholars, engage with leaders in science and technology policy, and discuss the latest topics in bioscience and health policy. Tailor your studies to your career focus, whether in policy, health care management, bioinformatics, data analytics/science, technology transfer, or preparing for medical school.
